

# Price List for Satellite Imagery

Effective October 15, 2010

## High Resolution Satellite Imagery from the RapidEye Archive

<b>Base Price</b>	Single User License	0.95 EUR / km <sup>2</sup>
<b>Contract Volume</b>	5,000 - 25,000 EUR	10% discount
	25,001 - 50,000 EUR	15% discount
	50,001 - 100,000 EUR	20% discount
	100,001 - 250,000 EUR	25% discount
	More than 250,000 EUR	upon request
<b>License</b> <small>(see License Agreement for details)</small>	Single User License	0% uplift
	Multi User License (2 - 5 users)	30% uplift
	Enterprise User License (6 - 10 users)	50% uplift
	Unlimited License	upon request
<b>Express Delivery</b>	24-48 hours (500 EUR min.)	1% uplift
	Less than 24 hours (1000 EUR min.)	3% uplift
<b>Minimum Order Size</b>		contiguous 1,000 km <sup>2</sup>

Prices are the same for both processing levels (1B and 3A). RapidEye sells in Euro.

## On Demand Tasking of RapidEye Satellite Imagery

The minimum order size is a contiguous Area of Interest of 5,000 km<sup>2</sup>. The base price is EUR 0.95 per km<sup>2</sup>. Pricing will also depend on additional factors:

- 1) Imaging window (the amount of time you allot for imaging your requested area)
- 2) Percentage of cloud cover
- 3) Historical weather data for your requested imaging area during your imaging window
- 4) Desired license agreement

Prices are the same for both processing levels (1B and 3A). Final pricing for tasking orders is available upon request. Please contact your local distributor or a RapidEye sales representative at [sales@rapideye.de](mailto:sales@rapideye.de).

## Most Up-to-Date Satellite Image Data

RapidEye's constellation of five identical Earth Observation satellites allows us to deliver extremely recent imagery. Any point on Earth can be accessed daily, which enables us to respond rapidly to emergencies or unforeseen events and to fill our Library with large quantities of current data (Standard Image Products). Our satellites can collect more than 4,000,000 km<sup>2</sup> of data daily, which makes RapidEye unique in providing large-area coverage in a high-resolution of 5m pixel size. The proven technology of our system and the redundancy of our five satellites enable us to offer reliable product availability.

### RapidEye Satellite Images are available in two different processing levels:

- RapidEye Basic Product (Level 1B)
- RapidEye Ortho Product (Level 3A)

The prices indicated in this list apply to both processing levels equally.

The quality of the processed products will depend on the ground control points (GCPs) and digital elevation models (DEMs) available to RapidEye. RapidEye will consider using customer-furnished GCPs and DEMs for the processing of its data. For more information about our imagery, please see the products page on our website: [www.rapideye.de](http://www.rapideye.de)

### The RapidEye Library Offers Customers Access to All of Our Satellite Image Products

All of our imagery is available through EyeFind, the RapidEye Online Archived Discovery Tool and can be obtained via our distributors or directly from RapidEye by visiting <https://eyefind.rapideye.de>. With our high imaging capacity of over 4 million km<sup>2</sup>, our Archive not only offers the most up-to-date data, but also all previously acquired data including multi-temporal datasets with unrivaled repeat coverages.

## General Terms and Conditions

All taxes, fees, duties and other charges levied by local authorities are the responsibility of the customer. All transactions are subject to RapidEye's General Terms and Conditions and RapidEye's End-User License Agreement which can be downloaded from the "Imprint" page of our website: [www.rapideye.de](http://www.rapideye.de). Contracts entered into with our distributors are the responsibility of the distributors.

## RapidEye Services

RapidEye not only provides multi-temporal, high-resolution satellite imagery. We also incorporate our products into geospatial information-based management solutions. Many companies worldwide have incorporated our solutions into their daily workflow. Our customers trust in us to deliver the most current information about their area that assist in faster decision making and future planning. Let's discuss how our services and products can benefit your needs; email our Sales Team at [sales@rapideye.de](mailto:sales@rapideye.de)
